

SPAIN

J. Alberto Chaves Sánchez
AECOSAN / A.C. Of Andalucia

Area of application

- Regional contact point in national alert (food) network (RASFF-SCIRI)
 - Management of RASFF and pre-RASFF notification at A.C. Level
- Part of SIASP (Integrated Public Health Alert System in Andalucia)
 - Management of alerts out of “*office hours*”
- Coordination with epidemiology surveillance service in outbreak investigations

Challenges

- Many different Formats (templates and systems) available
- Big amount of data
- Languages
- Time lapse for whole data reception
- Cross-border traceability
- Regulation do not define “how” but “what”
- Little business operator
- Poor traceability – lot definition

Expectations

- To be another tool part of toolbox useful in large outbreak investigations (focusing investigation)
- To be a help transforming data in information - testing hypothesis
- Find out Possibility To Extend use to food fraud alerts investigation?
- Easy to use in "*complex environments*"
- Find out synergy with other related task (data mining, non food-related health events investigation?)
