

Screenshot of the KNIME Workspace

[K1] points to the **File** menu.

[K2] points to the **Open DB GUI...** option in the **File** menu.

[K3] points to the **LOCAL (Local Workspace)** entry in the **KNIME Explorer** pane.

[K10] points to the **Supply Chain Reader** node (Node 1).

[K11] points to the **Tracing View** node (Node 2).

[K5] points to the **Execute** option in the context menu.

[K12] points to the **Edit Node Description...** option in the context menu.

Workflow Area is the central workspace where nodes are connected.

Node Description pane on the right shows details for the **Supply Chain Reader** node.

Node Repository pane on the left shows the available nodes, including **FoodChain-Lab** nodes like **Convert**, **Address Creator**, **FCL_DB_Writer**, **GIS Cluster**, **Geocoding**, **Shapefile Reader**, **Supply Chain Reader**, **Supply Chain Xml Reader**, **Tracing**, **Tracing View**, **TracingXmlOut**, and **GIS Nodes**.

KNIME Console at the bottom shows the execution log:

```

DEBUG NodeContainerEditPart Supply Chain Reader 0:1 (EXECUTED)
DEBUG NodeContainerEditPart Supply Chain Reader 0:1 (EXECUTED)
DEBUG NodeContainerEditPart Supply Chain Reader 0:1 (EXECUTED)
DEBUG NodeContainerEditPart Tracing View 0:2 (CONFIGURED)
DEBUG NodeContainerEditPart Tracing View 0:2 (CONFIGURED)
DEBUG NodeContainerEditPart Supply Chain Reader 0:1 (EXECUTED)
  
```

[DB5]

[DB7]

[DB8]

The screenshot displays the FoodChain-Lab Database Window. The main window has a toolbar with various icons and a search bar. Below the toolbar is a table with columns: ID, Products, Name, Address, Country, and Type of. The table contains 10 rows of data. A pop-up window titled 'Businesses for Back Tracing' is open, showing a list of business types with checkboxes for 'Caterer' and 'Educational institution'. Another pop-up window titled 'Similarity Search Settings' is open, showing settings for Station, Product, Lot, and Delivery, with a checkbox for 'Also show results previously marked as unique'.
